"Hypertension" is the medical term for high blood pressure. High blood pressure that has no known cause is called primary, or essential, hypertension. This type of high blood pressure is the most common and responds well to lifestyle changes, such as losing weight, dietary changes, exercise, and stress reduction.

Natural treatment of essential hypertension can help bring blood pressure values into the normal range.

Available in 90, & 180 count bottles

Suggested Use: As a dietary supplement, adults take one (1) capsule twice daily, preferably with meals.
