Behind the funny name of horny goat weed stands a time-tested aphrodisiac that increases libido in men and women, and improves erectile function in men. Known also as Epimedium or Yin Yang Huo, horny goat weed was first described in ancient classical Chinese medicinal texts. Today, horny goat weed holds an important place in Traditional Chinese Medicine and is gaining popularity around the world.

Used by practitioners for over 2,000 years, horny goat weed is several species of epimedium, a leafy plant which grows in the wild, most abundantly at higher altitudes. The leaves of the plant contain a variety of flavonoids, polysaccharides, sterols and an alkaloid called magnafloine. And while the exact way that horny goat weed works remains unknown, the plant has long been employed to restore libido, boost erectile function, allay fatigue and alleviate menopausal discomfort.

Available in 60 & 120 count bottles

Suggested Use: As a dietary supplement, adults take two (2) capsules 1 hour before physical activity. Do not exceed two (2) capsules daily.
