Hypothyroidism, also called under-active thyroid, is a condition in which the thyroid gland doesn't produce enough thyroid hormone to regulate the needs of the body.

Hypothyroidism is often misdiagnosed by doctors, because the symptoms are so diverse and vary with each person. Sometimes doctors attribute your symptoms to other causes. As many as 25 million Americans have hypothyroidism. About half of them have no idea that they do!

Thyroid Complex is a natural answer to your thyroid needs. Thyroid Complex provides a combination of nutrients and herbs that assist in the production and conversion of hormones produced by the thyroid and aids in the protection of the thyroid gland.

Available in 60 & 120 count bottles.

Suggested Use: As a dietary supplement, take one (1) capsule in the morning and one (1) capsule in the evening.
